PROFILE

Informatics Engineering student at Electronic Engineering Polytechnic Institute of Surabaya with focused on mobile and backend development, experienced with Flutter, .NET, Laravel, PostgreSQL, REST API, and Git. Possesses problem solving, analytical thinking, teamwork, communication, adaptability, continuous learning skills, and able to learn new technology and apply them to build structured software solutions.

EDUCATION

Electronic Engineering Polytechnic Institute of Surabaya

Surabaya

D4, Informatics Engineering | GPA: 3.71/4.00

August, 2026 - Present

Relevant Courses: Object-Oriented Programming, Algorithms and Data Structures, Databases, Advanced Databases, Mobile Device Programming, Web Programming, Software Design Patterns, DevOps, Cloud Computing, and Cloud Architecture

ORGANIZATION EXPERIENCE

Product Owner

Surabaya

WareHaus

April 2026 - September 2026

- Leading the development of the Warehouse Management System (WMS) by coordinating product requirements and the development team to ensure features meet user needs.
- Prioritizing features based on operational needs and stakeholders to keep development focus on features that impact warehousing processes.
- Bridging user needs with the development team through cross-role communication and collaboration to ensure business requirements are translated into appropriate technical solutions.
- Managing the product development process collaboratively by applying problem solving and decision-making in product decisions.

Mobile Developer

Surabaya

WareHaus

April 2026 - Present

- Developing a WMS mobile application using Flutter to support inbound and outbound processes, so warehouse operations can be conducted through a mobile application.
- Integrating the Flutter application with REST API in collaboration with the backend team to support seamless data exchange between the mobile app and the backend system.
- Collaborating with frontend and backend teams to translate user needs into mobile features that align with the Warehouse Management System workflow.

Committee

HIMIT Orientation

Surabaya

April 2026 - May 2026

- Maintained order and discipline among participants throughout the LKMM Pra-TD program.
- Monitored participant activities to ensure compliance with event rules and procedures.
- Coordinated with the committee to address participant-related issues and maintain a well-organized environment.

Committee

Pre-Basic Student Management Skills Training

Surabaya

November 2025 - November 2025

- Support the implementation of LKMM Pra-TD activities as a standby team by assisting coordination and ensuring activity needs are met during the event.
- Collaborate with the committee and related teams in carrying out field duties and ensuring activities run according to needs.
- Develop communication skills, teamwork, responsibility, and responsiveness through direct involvement in activities.

Committee

PENS Fest

Surabaya

October 2025 - November 2025

- Manage PENS Fest 2025 equipment needs by preparing and ensuring the availability of equipment to support smooth event execution.
- Coordinate equipment requirements and usage with the committee and related teams to ensure event needs are met according to schedule.
- Handle equipment needs during the event by applying problem solving and time management to maintain operational smoothness.
- Collaborate with cross-divisional committees to ensure equipment readiness and resolve technical needs during the event.

Portofolio

WareHaus - Warehouse Management System

Warehouse Management System (WMS) designed to improve warehouse operational efficiency through intelligent zone management, barcode/QR verification, and structured inbound & outbound flow. This system helps optimize the processes of receiving, put-away, picking, packing, and shipping while minimizing human error in inventory and shipping management. Developed using Flutter for mobile, .NET for backend, TypeScript for frontend, PostgreSQL as the database and Agile as the methodology and mindset.

Skill

Hard skill	: Mobile (Flutter, dart, React Native), Backend(.NET, Laravel, Node.js), Frontend (React, Next), Database (PostgreSQL), dan API & Tools (REST API, Git, GitHub, Postman, Docker).
Soft skill	: Collaboration, Analytical Thinking, Problem Solving, Adaptability
Language	: English (Intermediate), Indonesia (Fluent)
